MINUMULA SREE NILAY REDDY

Jangaon, Telangana
Phone: 9391472578 | sreenilayreddy@gmail.com | github.com/sreenilay07 | linkedin.com/in/sree-nilay-reddy

Summary

Artificial Intelligence and Machine Learning undergraduate with strong interest in Software Engineering, Backend Development, and AI-powered applications. Experienced in building full-stack MERN applications, RESTful APIs, real-time systems, and NLP-driven solutions using JavaScript, TypeScript, Python, MongoDB, React, Node.js, and Express.js. Strong foundation in data structures, object-oriented programming, database systems, and scalable application design with interest in large-scale engineering platforms.

Engineering Highlights: MERN Stack Development REST APIs Backend Engineering Database Design Real-Time Systems AI Integration

Projects

SREE AI NLP-Based Stock Market Analyzer | MERN Stack, React, Node.js, TypeScript
GitHub | Live Application

- Designed an NLP-driven stock screening pipeline enabling plain-English financial queries.
- Engineered backend API integrations to process market data and generate buy/sell/hold decision workflows.
- Built chart-based visualization modules supporting portfolio comparison and trend analysis.
- Structured application logic simplifying financial analysis workflows for beginner investors.

Easy Code AI-Assisted Multi-Language Compiler | MERN Stack, React, Node.js, TypeScript, Groq APIs
GitHub | Live Application

- Architected an AI-assisted development environment supporting debugging, explanation, and guided code completion.
- Integrated Groq APIs enabling low-latency AI response pipelines for developer assistance.
- Implemented hint-first problem-solving workflows encouraging structured learning instead of direct solutions.
- Built chatbot-based error analysis modules to diagnose issues and suggest actionable fixes.

TRINETRA AI-Powered Online Examination Intelligent Proctoring Platform | MERN Stack, TensorFlow.js, Socket.io
GitHub | Live Application

- Developed an AI-powered online examination platform with real-time monitoring and intelligent proctoring capabilities.
- Implemented TensorFlow.js based violation detection and live monitoring workflows for examination integrity.
- Engineered secure exam management and authentication systems using React, Node.js, Express.js, and MongoDB Atlas.
- Built Socket.io powered real-time communication modules for live updates and monitoring dashboards.

CERTIFICATIONS

C Programming Fundamentals MindLuster — Credential
Generative AI Fundamentals Simplilearn — Credential
MongoDB Atlas — Credential

Education

Anurag University — 2024–2028
B.Tech – Artificial Intelligence and Machine Learning
CGPA: 8.6 (Current)

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL
Web Development: React.js, Node.js, Express.js, HTML, CSS
Databases: MongoDB Atlas, SQL
Frameworks & Tools: Git, GitHub, REST APIs, Socket.io, TensorFlow.js, Groq APIs
Core Concepts: Data Structures, Object-Oriented Programming, DBMS, Machine Learning
Engineering: MERN Stack Development, Backend Systems, API Integration, NLP Query Processing

Relevant Coursework

Data Structures | Object-Oriented Programming | Database Management Systems | Machine Learning

Languages

Telugu | Hindi | English
